

Performance MOBILE ELEVATED STAGES PLATFORM

STANDARD PERFORMANCE PLATFORM FEATURES

Mobile Performance Platforms offer elevated outdoor staging with quick, hydraulically powered, one-person setup. Outdoor, all-weather components are used throughout. Platform may be set up as a 24 foot deep stage or 15 foot deep stage with an 8-1/2 foot high back drop. When folded for road transport, the Platform can be used to transport stairs, tables, chairs, and equipment

- 18" Deep Steel Channel Frame** - galvanized steel components
- Removable Towing Tongue** - standard pintle coupler (optional ball coupler and safety chains)
- Leveling/Support Jacks** - 25,000 lb capacity each, adjust to unlevel ground
- Tandem-Axle Suspension** - includes four (4) wheel electric brakes and highway rated tires
- Aluminum Platform Deck** - continuous all-weather stage deck formed with interlocking structural aluminum extrusion sections. Stage deck surface has skid-resistant surface pattern.
- Deck Leveling/Support Trusses** - simplify and expedite setup by maintaining a flat deck and eliminating multiple leveling legs. Leveling trusses automatical unfold as decks lower.
- Guard Rails** - provided along rear folding section perimeter
- Hydraulically Actuated Folding Stage Decks** - allow fast, easy one-person setup. Built-in self-contained 12VDC system and charger.
- Aluminum Stairs** - 47" wide, diamond plate treads, fully enclosed risers, handrails, and adjustable legs. Stairs meet ADA code.
- Highway Light Package** - includes marker and signal lights, reflectors, license plate bracket and light, cable and connector.
